

Installing the Fiberworks Demo

Drag the file **Fiberworks.app** and the folder **My Weaving** to your **Documents** Folder. If you already have a folder named My Weaving, drag the folder **Samples** contained in My Weaving into your Documents folder or into your existing My Weaving Folder.

Then drag **Fiberworks.app** from Documents and drop into your **Applications** folder.* You may also want to drag the icon into the Dock.

* If you drag the Fiberworks.app straight from the disk image folder into the Applications folder, you get a funny looking icon.

This is a **demo** version of Fiberworks, with **Print** and **Save** actions removed. You can open designs and try out the features, but it can't be activated to a full version. We hope to have full production versions of Fiberworks available shortly.

Pricing for the production versions:

	web download	CD by mail	CD and Manual by mail
Fiberworks Bronze:	\$130	\$140	\$165
Fiberworks *	\$160	\$170	\$200
